360° GoPro® Maker Kit
Guide

With the GoPro MAX® you get 3 cameras in one small, powerful device, providing you with unreal spherical footage, HERO-style videos plus photos and vlogging capabilities second to none. The 360° capabilities deliver amazing panoramic photos and 360° Timelapse options as well. With unbreakable image stabilization, premium audio from 6 mics and a sleek waterproof design, this camera will help capture life's magical moments.

Starting Out

You'll want to start by making sure the GoPro MAX® is charged. Open the side door by moving the latch to open the charging port. Plug one end of the USB cable into a wall charger or computer, and the other end into the charging port of the camera. The display on the camera will show an estimate of the battery's life. At full charge, it should last for a few hours of filming.

While you are charging the GoPro, it would be a good time to install the free **GoPro** and **Quik apps** on your mobile device. They are available for download in the App Store & Google Play. **Quik Desktop** is also available for free download to your Windows or Mac computer from https://shop.gopro.com/softwareandapp

Filming

The GoPro MAX®'s one-button operation means you just press the red button to start filming, then press it again to stop filming. You can also control the device remotely with the included GoPro Smart Remote or the GoPro App. The advantage of using the app is that you can use your phone's screen as the GoPro's monitor and see what you're filming when you are filming it. We've included a number of various accessories you can use to attach the GoPro MAX® to your bike, car, skateboard, surfboard, helmet…even your body. Go wild! When you're done filming, use the GoPro and/or Quik apps to edit and combine your videos into your very own action movie.

Troubleshooting

You should be able to find all you need about using the GoPro MAX® in the GoPro app and the included book. However, you can find additional information in the GoPro Support Hub: https://community.gopro.com/

If you experience problems, you may also contact the Reference Desk at cvref@wclibrary.info
