

Celestron® Travel Scope 70 Guide

This kit is designed to let your child learn about space with a beginner-friendly telescope.

Age Recommendations

This kit is recommended for children ages 8-up with the help of an adult.

***NOTE: This kit contains small parts. It is not recommended for use with children under 3.**

****NOTE: Never use the telescope or your bare eyes to stare directly at the sun.**

Starting Out

This telescope is meant for beginners, but it's still fragile! **Please work with your child to assemble/disassemble the parts and focus the lenses to limit damage.**

Space is fascinating! To better observe the sky above us, we use tools called telescopes. The included book, *Explore Telescopes*, will teach your child about different kinds of telescopes, how they manipulate light, and what scientists are currently using them for. Not sure what to look at? Check out the second included book, *50 Things to See with a Telescope*, which can help you find several constellations, planets, and comets. If you're lucky enough to have this kit during solar eclipses, use the Mini SUNoculars™ to safely watch the phases.

To use Celestron's® complementary mobile planetarium with this telescope, download the SkyPortal app:

Google Play Store - <https://play.google.com/store/apps/details?id=com.celestron.skyportal>

Apple App Store - <https://itunes.apple.com/us/app/celestron-skyportal/id877780544?mt=8>

If you prefer to use a computer, download the Celestron® PWI Control Portal Software onto your home device:
