

## Electric Balloon Pump Maker Kit Guide

Easily create a warm and fun atmosphere with this user friendly, electric balloon air pump. Create unique decorations for parties, festivals, celebrations, centerpieces and much more!

### Starting Out

The electric balloon pump is very easy to use! Open the side panel and carefully plug in the cord, then power on the machine and get your balloons ready! This balloon pump has dual nozzles, giving you the option to inflate many balloons fast and efficiently. If you have smaller balloons, use the small nozzle attachments by screwing them into the built-in nozzles. Place your balloon over the nozzle and let it inflate your balloon to the desired size.

Once the inflation is complete, remove the balloon from the nozzle and use the balloon tying tool to assist you with easily tying a knot in your balloon. This electric balloon pump will help you make your party preparations a breeze!

The videos below are a great resource to get you familiar with using the balloon pump and the balloon tying tools.
