

## Junior Astronomer Maker Kit Guide

This kit is designed to help your child learn about the basics of outer space and the careful handling of astronomy tools.

### Age Recommendations

The Junior Astronomer Kit is recommended for children ages 4 to 8.

### Starting Out

This kit provides your child with an introduction to aspects of outer space which many children harbor curiosities about.

Want to learn about constellations? Your little one can memorize the visuals of the most common ones while working on their fine motor skills with the lacing constellation cards. Want to learn about eclipses? Use the special mini SUNoculars™ for safe solar viewing. Learn about phases of the moon and the idea of symmetry with the provided moon phases puzzle. Lastly, learn how to use a telescope with the Talking Space Explorer™ which functions like a viewfinder with fun images and quizzes!

### Troubleshooting
