

Mock Dissection Kit Guide

This kit is designed to let your child get the benefits of a dissection lab without using real specimens.

Age Recommendations

This kit is recommended for children ages 6 and up.

NOTE: This kit contains small pieces and is not intended for children under 3 years old.

Starting Out

Dissections are often incorporated into school curriculum. While these labs serve a purpose, it is understandable that some might not agree with using a real specimen.

The two labs included in this kit (frog and goldfish) provide several benefits without harming animals. Each can be put together and taken apart for repeated practice. The detail included with each is wonderful, which allows for a close-up, in-depth look at organ systems. Each has an assembly guide to help you work through construction, and each comes with facts about the internal systems you are reviewing. Additionally, these labs are great for elementary school users which opens up learning to those who are typically too young for dissection.
