

Raspberry Pi Maker Kit

Guide

The Raspberry Pi is a tiny computer that you can use to learn programming through fun, practical projects. Combined with a variety of sensors and accessories, the possibilities are endless when it comes to project ideas.

Starting Out

The Raspberry Pi kit includes everything you need to get started. We've included many different sensors and installed several different coding languages on the Raspberry Pi to get you started with coding.

To use the included touchscreen monitor, you must first set up and program the Raspberry Pi to work with it. This YouTube video will help you with the setup of the monitor: <https://www.youtube.com/watch?v=tK-w-wDvRTg>.

Then follow the troubleshooting guide from Adafruit located here:

<https://www.raspberrypi.org/documentation/hardware/display/troubleshooting.md>

There are many things that you can create using the Raspberry Pi. The included book shows many projects you can try. To find more, visit the Raspberry Pi site at <https://www.raspberrypi.org/>.

Troubleshooting

You can find manuals, downloads, an interactive guide, and troubleshooting solutions online at: <https://www.raspberrypi.org/>. Additionally, you can find many videos with tips and tutorials for using the Raspberry Pi on YouTube.

Feedback

We would love to hear how your experience was! Please complete this survey:
