

Cello Maker Kit

Guide

The included book, *Essential Elements for Strings: Book 1*, should contain everything you need to learn how to play the cello.

Starting Out

You will probably want to start by tightening your bow. The horsehair should always be loosened before you store it in the case and will need to be tightened before playing. You tighten the bow by turning the adjusting screw on the end in a clockwise direction.

After that, you will want to begin tuning the cello. An electronic tuner is included and instructions can be found on page 3 of the included book.

Once tuned, you can continue through the book to learn everything you need to know to start playing the cello!

Troubleshooting

If you experience problems, please contact the Reference Desk at cvref@wcpl.lib.oh.us.

Feedback

We would love to hear how your experience was! Please complete this survey:
