

Microscope Lab Maker Kit Guide

The Microscope Lab kit is designed to engage your child's curiosity by providing a view into the microscopic world.

Age Recommendations

Microscope Lab is recommended for children ages 6 and up.

NOTE: This kit contains small parts and should not be used by children under 3 years.

Starting Out

Microscope Lab is great for budding scientists who want to see beyond the visible. The kit provides a great first lesson in plant material and earth sciences.

Choose a prepared slide and place it on the stage. Then, turn on your microscope and choose which light and magnification you would like to use. (The included instruction booklet tells you how to use the device and which light/magnification to use to best view your chosen specimen.)

Once you have mastered prepared slides, see the same instruction booklet for steps on how to make your own, unique slides!

NOTE: Though made for children, this microscope is fragile. Please handle with care. Furthermore, please refrain from writing in the Microscope Lab guide so that all patrons can put the scientific method to the test!

Troubleshooting
